New World Revisited Aldous

Huxley 2021-03-12 Brave New

World is a dystopian social science fiction novel by English author Aldous Huxley, written in 1931 and published in 1932. Largely set in a futuristic World State, whose citizens are environmentally engineered into an intelligence-based social hierarchy, the novel anticipates huge scientific advancements in reproductive technology, sleep-learning, psychological manipulation and classical conditioning that are combined to make a dystopian society which is challenged by only a single individual: the story's protagonist. Huxley followed this book with a reassessment in essay form, *Brave New World Revisited* (1958), and with his

final novel, *Island* (1962), the utopian counterpart. The novel is often compared to George Orwell's *Nineteen Eighty-Four* (published 1949). In 1999, the Modern Library ranked *Brave New World* at number 5 on its list of the 100 best English-language novels of the 20th century. In 2003, Robert McCrum, writing for *The Observer*, included *Brave New World* chronologically at number 53 in "the top 100 greatest novels of all time", and the novel was listed at number 87 on *The Big Read* survey by the BBC. This edition pairs *Brave New World* with *Brave New World Revisited*, Huxley's book about the original novel.

Science and Religion in

Western Literature Michael

Fuller 2022-08-16 This book explores ways in which Western literature has engaged with themes found within the field of science and religion, both

historically and in the present day. It focuses on works of the imagination as important locations at which human arguments, hopes and fears may be played out. The chapters examine a variety of instances where scientific and religious ideas are engaged by novelists, poets and dramatists, casting new light upon those ideas and suggesting constructive ways in which science and religion may interact. The contributors cover a rich variety of authors, including Mary Shelley, Aldous Huxley, R. S. Thomas, Philip Pullman and Margaret Atwood. Together they form a fascinating set of reflections on

some of the significant issues encountered within the discourse of science and religion, indicating ways in which the insights of creative artists can make a valuable and important contribution to that discourse.

Brave New World Revisited

Aldous Huxley 2014-01-01

When Aldous Huxley wrote his famous novel *Brave New World*, he did so with the sincere belief that the dystopian world he created was a true possibility given the direction of the social, political and economic world order. Written almost thirty years later, *Brave New World Revisited* is a re-evaluation of his predictions based on the

changes he had witnessed in the meantime. In this twelve-part essay, Huxley argues that society is moving toward his dystopian vision even faster than he had originally assumed, and provides his own suggestions on how to bring an end to this decadent decline.

Brave New World Revisited

condemns symptoms of modern life such as overpopulation, propaganda and extreme government control while providing a staunch defence of individualism. Despite being published over fifty years ago, the problems identified in *Brave New World Revisited* are still startlingly relevant, lending a chilling credibility to Aldous

Huxley's unsettling predictions.
