International Logistics Donald F. Wood 1995-01-31 Both academia and the real world are showing a vastly increased interest in international logistics. Although this book covers the entire topic, it may not contain sufficient detail to answer all questions. The topic-and the challenge is much larger than any single book can cover! A number of people helped us, and their assistance should be recognized. They include Robert L. Argentieri, Eunice Coleman, Patricia J. Daugherty, Robert Derbin, Robert Hannus, Ken Knox, Douglas Long, Eugene L. Magad, Dale S. Rogers, Robert Rouse, John Silvey, and Clyde Kenneth Walter. This book is designed for both the business world and the classroom. A separate Instructor's Manual has been prepared and may be requested on school letterhead from Chapman & Hall. International Logistics 1 Introduction This book is about international logistics and the international logistics system. International means that it will deal with transactions involving individuals or firms in more than one nation. Logistics means the organized movement of goods, services, and, sometimes, people. Logistics was originally a military term. For example, in author Tom Clancy's novel, Red Storm Rising, Russian General Alekseyev thought to himself about a battlefield situation: "The tactics ... no, amateurs discuss tactics. Professional soldiers study logistics. ..." When one speaks of the international logistics system, he means that huge array of carriers, forwarders, bankers, traders, and so on that facilitate international transactions, trades, and movements of goods and services. Communications are important, and a logistics system includes whatever communication capability it needs.

George Müller of Bristol, 1805-1898 Arthur T. Pierson 2008 George Müller's life may be described as a primer on the miracle of answered prayer. When Müller felt called by God to care for orphans, he had only a few cents in his pocket. Without ever asking anyone other than God, he received over \$7,200,000 dollars (in 1800's money) through prayer alone. Müller established Orphanages in Bristol, England, and founded the "Scriptural Knowledge Institution for Home and Abroad," the object of which was to aid Christian day-schools, to assist missionaries, and to circulate the Scriptures. His life was characterized by prayer, faith, and self-denial in the cause of Christ. During his lifetime, he established 117 schools which educated more than 120,000 young persons, including orphans. From the age of seventy until ninety, Mr. Müller began to make great evangelistic tours. He traveled 200,000 miles, going around the world and preaching in many lands and in several different languages. This classic biography of George Müller tells of his dependence on prayer and his compassionate concern for orphans in Bristol, England. George Müller (1805-1898) was well-known for his constant faith in God and for providing an education to the children under his care, to the point where he was accused of raising the poor above their natural station in life. Müller left a charitable legacy that continues to this day. George Müller of Bristol was written the year after Müller's death by his close friend, Arthur T. Pierson, an American preacher and evangelist. HENDRICKSON CLASSIC BIOGRAPHIES feature enduring stories about real people whose lives have been touched and transformed by God, and who in turn have touched others with God's love. Each story has been carefully selected, gently edited if necessary, and freshly typeset, making every account be it ancient or contemporary a compelling read. Great lives reaching across the ages to touch lives today, encouraging, challenging, and inspiring.

The Dry Forests and Woodlands of Africa Emmanuel N. Chidumayo 2010-09-23 The dry forests and woodlands of Sub-Saharan Africa are major ecosystems, with a broad range of strong economic and cultural incentives for keeping them intact. However, few people are aware of their importance, compared to tropical rainforests, despite them being home to more than half of the continent's population. This unique book brings together scientific knowledge on this topic from East, West, and Southern Africa and describes the relationships between forests, woodlands, people and their livelihoods. Dry forest is defined as vegetation dominated by woody plants, primarily trees, the canopy of which covers more than 10 per cent of the ground surface, occurring in climates with a dry season of three months or more. This broad definition - wider than those used by many authors - incorporates vegetation types commonly termed woodland, shrubland, thicket, savanna, wooded grassland, as well as dry forest in its strict sense. The book provides a comparative analysis of management experiences from the different geographic regions, emphasizing the need to balance the utilization of dry forests and woodland products between current and future human needs. Further, the book explores the techniques and strategies that can be deployed to improve the management of African dry forests and woodlands for the benefit of all, but more importantly, the communities that live off these vegetation formations. Thus, the book lays a foundation for improving the management of dry forests and woodlands for the wide range of products and services they provide.

Bark Canoes and Skin Boats of North America Edwin Tappan Adney 2014-04-01 Everything you need to know about the nearly lost art of bark and skin craft. The bark canoes of the North American Indians, particularly those made of birch bark, were among the most highly developed manually propelled primitive watercraft of their time. They could be used to carry heavy loads in shallow streams but were light enough to be hauled long distances over land. Built with Stone Age tools from available materials, their design, size, and appearance were varied to suit the many requirements of their users. Upon arrival in North America, European settlers began using the native-made craft for traveling through the wilderness. Even today, canoes are based on these ancient designs. Bark Canoes and Skin Boats of North America combines historical

background with easy-to-understand, practical instructions. Author Edwin Tappan Adney, born in 1868, devoted his life to studying canoes and was practically the sole scholar in his field. His papers and research have been assembled by a curator at the Smithsonian Institution and illustrated with black-and-white line drawings, diagrams, and photos. Included here are measurements, detailed drawings, construction methods, and models. The book covers canoes from Newfoundland to the Pacific Ocean, as well as umiaks and kayaks from the Arctic. Bark Canoes and Skin Boats of North America is not only a must-have for boatbuilding hobbyists, but also for those with a fascination for the history behind them. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more.
