Education and Technology for a Better

World Arthur Tatnall 2009-07-14
Education and Technology for a Better
World was the main theme for WCCE
2009. The conference highlights and
explores different perspectives of
this theme, covering all levels of
formal education as well as informal
learning and societal aspects of
education. The conference was open to
everyone involved in education and
training. Additionally players from
technological, societal, business and
political fields outside education
were invited to make relevant
contributions within the theme:
Education and Technology for a Better
World. For several years the WCCE
(World Conference on Computers in
Education) has brought benefits to
the fields of computer science and
computers and education as well as to
their communities. The contributions

at WCCE include research projects and good practice presented in different formats from full papers to posters, demonstrations, panels, workshops and symposiums. The focus is not only on presentations of accepted contributions but also on discussions and input from all participants. The main goal of these conferences is to provide a forum for the discussion of ideas in all areas of computer science and human learning. They create a unique environment in which researchers and practitioners in the fields of computer science and human learning can interact, exchanging theories, experiments, techniques, applications and evaluations of initiatives supporting new developments that are potentially relevant for the development of these fields. They intend to serve as

reference guidelines for the research community.
